Hi, Rich. Attached are 20 draft memos related to the reanalysis of lithium in the Dimock homewells. One memo addresses all the wells without hits above the screening level; the other 19 are for individual residences with exceedances. Please let me know if you have questions.

I'll be leaving for Denver on Monday (7/9) and returning on Friday (7/13). I'll have my cell phone and lap top with me, and will be checking Voice Mail (work) and Lotus Notes. Feel free to contact me if any problems arise. Thanks.

Dawn
